While almost all worlds should work if your version is different from what has been tested, it is possible that some of the places may not appear! If you're also playing on a PC or other device, make sure to head over to our Best Minecraft Seeds or Minecraft 1.16 Seeds post even more options! Stronghold Ravine Village at Spawn Credit: FryBry - Seed: 1349679922 - Version: Bedrock 1.16 We all love good caviar where if you immediately move forward after spawning you will fall into a massive double ravine and into the lava. What's even better is that this ravine is home to a fortress! Even better, you spawn in the village where you can get some basic materials, steal some stuff from the locals, then try the fortress as quickly as possible. If you're a speedrunner, this seed is perfect for you! Not only are you spawning near a sweet desert village that is surrounded by unique biomas, you have a bunch of villages in the

area that you can visit that are different in their types of biome! You are also near the desert, so there are three bioma connected in the village. There's also a very large ravine next to the village that you can explore. On caviar, you'll find a village right next to that is worth checking out! If you head into the desert, there are several pyramids and another village. You spawn right in the middle of the area where a few rivers converge and this makes the landscape look very impactful. Not only that, there is a village very close by, and also a witch hut that you can use for potions or maybe taming a black cat! You also have access to a ruined portal in the mountainous area, taiga village and birch forest around you. There's a lot to love about this seed if you like variety. You spawn between two villages and large ravines. The area here is pretty flat so you could build this area relatively easily. If you head to the desert biom, you will find two different villages and three pyramids to explore! If you get further from spawning, you will find a rather interesting floating island. Nearby there is a ravine with a mine to be explored. In the net you will spawn right in the huge basalt biome delta, along with the shower sand and crimson forest is not too far away! This is very useful, so that in itself may be worth it. If you explore outwards, you will find some interesting areas to explore. It's a pretty heavily wooded seed with lots of cold areas, so if you're into that you'll probably enjoy it. There are mountains, snow taiga and a whole separate snow biom opposite the coral reef. You'll find a couple of ocean ruins there as well as a haunted snowy village! One of the nice features of this is the savannah village, which is partly located on a hill with a waterfall on it. There's a desert village, a rip-off outpost, and a second desert village to explore! In Nether, you'll find a perverted forest and a huge basalt delta if you place your portal next to the caviar. There's a valley of sand showers not too far from it, and if you venture deeper into the zone you will find the remains of a bastion! You could potentially cut this a little more and get really artistic if you want to! It would make for a great focal point for your next base. There's also a pretty interesting area not too far from spawning, which has three ocean ruins that are on land! You can explore them and get some quick resources out of the chests. If you make a nether portal not too far from the original caviar, you will get a really good layout! There's soul sand, crimson forest, deformed forest, and basalt delta all pretty close together. If you want to have access to these areas, then this is a great seed. The nearby Remnant bastion is also very good and has great shape, with a treasure trove easily accessible once you are inside! There's a cave system under the caviar, and if you head to the coordinates (show them in the options) listed below, you'll find six diamonds! There's also a ravine that's a bit of a hike from spawning, but if you make the trip you'll be rewarded with a pair of open diamonds. Make your way down the natural cave path and you have to run straight into it. There's extra spawning next to this, so you're not going to be hurt for finding places to farm monsters. There's also a few nearby ravines that almost all have been exposed to diamonds! This should be a lot of fun to explore and help you start on your right foot.
